

# Spring water delivered to your door

## Ceramic Water Dispensers

**The Water Delivery Company** is a drinking-water delivery service in London. We also sell a variety of water coolers ideally suited to use in kitchens, around the house or in an office

Small in height the ceramic is designed to sit on a work surfaces or a table. The floor stand is optional. The ceramic dispenses room temperature water and is not attached to any electricity source.

When you purchase the ceramic we then start delivering 12 litre or 19 litre bottles of spring water on a regular basis directly to your door. This is the perfect kit for people interested in water coolers and customers often choose to upgrade to a water cooler. We of course will offer you money back on your ceramic if you choose to upgrade.
