

Springtime changes

London's leading Water Delivery Company

The Water Delivery Company launch a new range of small pack water.

As part of our ongoing changes we have also changed our supplier of small pack water. The range of sizes will remain the same, but, as you can see from the pictures below, the bottles look great.

The UK's First Water Cooler Blog Launched

Staying ahead of innovation has always been important to us. In February we launched our blog site to give customers more details information about water coolers and our company.

Welcome to the February newsletter to our customers.

The Water Delivery Company are upgrading our water supplier. From the end of February the water that you will be drinking will be sourced from **Fonthill Pure English Spring Water**.

FONTHILL
PURE ENGLISH
SPRING WATER

The Fonthill spring is located in Wiltshire, and the water is naturally filtered through limestone rock before emerging from modern boreholes close to the historic Penning and Berwick wells.

The spring water is of the highest standard and detailed information on the mineral analysis is available from the **water information page on our website**. As ever, it will take no more than 72 hours for the water to travel from the source to your door.

This is good news for all our customers because:

We are keen to help all our customers through this recession, so we are pleased to announce that **as a result of changing our water supplier the price of our water will not be raised throughout 2009**. This makes it fully three years and counting since our water prices last rose.

Furthermore the change means we have again reduced the number of miles that our water has to travel. So not only are we saving you from the recession, we are also saving you from global warming.

Plastic Cup Price rise from April 1st

Unfortunately, we have some bad news on cups. Despite concerted efforts, we have been unable to find a replacement cup supplier that would allow us to maintain our price levels for cups. The prices to us have risen largely as a result of the weakness of Sterling against the Euro, and we are now going

25/02/2009
