

FONTHILL

PURE ENGLISH
SPRING WATER

when anyone asks where our **pure english spring water** comes from...

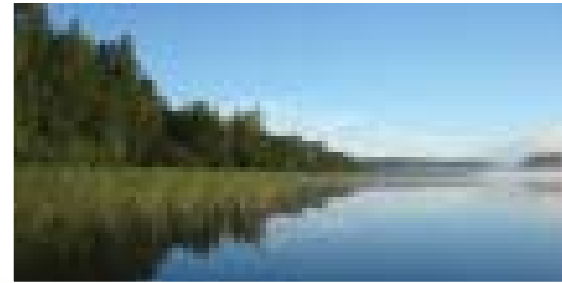

FONTHILL
PURE ENGLISH
SPRING WATER

filtered by nature
bottled at source

The development of a new 16,000 sq ft filling hall, office and warehouse was completed in the spring of 2007 and fulfilled our plan to keep the company at the forefront of the contract bottling market. The filling plant and the water source are audited and approved every year by the British Water Cooler Association (BWCA) who set the quality standards for water cooler bottling plants in the UK. We achieved a 100% pass in the 2007 audit. Our staff also undergo BWCA plant operator and hygiene training.

FONTHILL WATERS LTD is an ISO 9001 registered company. Achieving this accreditation demonstrates our commitment to quality and the importance we place on meeting our customer's needs. Our certificate number is GB9728 and a copy of our quality manual is available on request.

...we assume it's a rhetorical question

We are located close to the A303 in Wiltshire. Delivery anywhere in the UK is easy and convenient. Our immaculate, delivery trailers provide cost effective distribution of anything from 32 up to 1,248 bottles in one load.
